Question:	**What were the strongest qualities of the course?**
Response Rate:	**100.00**% (**2** of **2**)

1	The class gave me a good look at what I will be doing for web design and my degree in general

2	It was beneficial to have had a course previous to this one that was an intro to this course. It was also nice to have all the resources from Bootstrap, jQuery, and other coding options. It is also nice that there are so many learning sites on Google, so when I was outside of class and not able to ask questions, I can look it up on a credible source for help.

Faculty:	**Kyle Herges**
Question:	**What suggestions would you offer the instructor to improve the course?**
Response Rate:	**100.00**% (**2** of **2**)

1	There really isn't anything that I can think of. The course is laid out in a way that the semester plan is very clear and we know exactly what we are doing. Kyle is one professor that I can tell genuinely cares about his students doing good and succeeding, and that is not something I can say about all my professors.
2	I felt that the discussions were heavily skewed toward freelancing when I don't see myself being a freelancer. I would have liked to see more about e-commerce instead

Question:	**What were the strongest qualities of the course?**
Response Rate:	**100.00**% (**1** of **1**)

1	Learning advanced, new techniques that can help us in the future of web design.

Faculty:	Kyle Herges
Question:	What suggestions would you offer the instructor to improve the course?
Response Rate:	100.00% (1 of 1)

1	Good transition with the e-learning. It did make our final a bit difficult, but he has been great about being available for questions.

Question:	**What were the strongest qualities of the course?**
Response Rate:	**60.00**% (**3** of **5**)

1	The discussion articles applied a lot to what we did, which actually surprised me for some reason. The 'I Can Do That' assignments weren't fun by any means but they challenged the students in a good way. Digging into the non-coding aspects of web design (proposals, contracts, estimates, etc.) were very helpful and made me feel more prepared for life after college.
2	Being shown how to do something then putting us to the test to see if we were able to.
3	Being able to do some of the coding on our own.

Faculty:	Kyle Herges
Question:	What suggestions would you offer the instructor to improve the course?
Response Rate:	60.00% (3 of 5)

1	We ran into some technical issues with the computers (which is odd because they are so new). Get IT to have a good look at them to see if they are a DreamWeaver/Adobe or a computer problem.
2	I would like if we had some of the same quizzes we had the semester before to keep our memory up with the terms and tags.
3	Get rid of the discussion posts...

Question:	**What were the strongest qualities of the course?**
Response Rate:	**100.00**% (**2** of **2**)

1	Great walk through of processes for different assignments. The learning and skills are continually built on a used again and again as the course progresses.
2	The learning environment is comfortable and relaxed.

Faculty:	**Herges, Kyle N**
Question:	**What suggestions would you offer the instructor to improve the course?**
Response Rate:	**100.00**% (**2** of **2**)

1	More of a focus on the process of setting up the actual design. I sincerely think that most of these projects would be 1xxxx times as valuable if the sources photos were good quality. Chances are pretty good that if the elements and principles of design are not present in the source images - the final product will reflect that. (not always) Also, graded presentations of major projects. Additionally, a couple key large projects could be slightly more open in requirements but open to refinement after CONSTRUCTIVE feedback is given and evaluated. Finally - I hate macs.

2 Take more time to review terminology and more in-class discussions about html and css.

Question:	**What were the strongest qualities of the course?**
Response Rate:	**50.00**% (**2** of **4**)

1	Hands-on learning. Help when needed. I like the "you can do this" assignments. Small class. Good atmosphere.
2	The small class size really made it easy to communicate with the teacher and other students

Faculty:	**Herges, Kyle N**
Question:	**What suggestions would you offer the instructor to improve the course?**
Response Rate:	**50.00**% (**2** of **4**)

1	Maybe if the discussion posts were worth less points. They are nice for adding extra points to the grade-book but the discussion is not always related to what we are doing in class so it is easy to forget about which makes it more of a hindrance to our grade. So, lowering the points on it might make it less stressful but also still a way to get more points.

2 I think it went well. The course topic can just be tricky at times

Question:	**What were the strongest qualities of the course?**
Response Rate:	33.33% (**2** of **6**)

1	I really liked the hands on approach used in this course. The opportunity to actually work on the web pages and learn through doing the actual coding was very beneficial. It not only helps you learn the material, but gives you a taste of what a career in web design is actually like.
2	The strongest quality of the course was that it was very hands on with everything we went over in class. This really helped to cement what we were learning.

Faculty:	**Herges, Kyle N**
Question:	**What suggestions would you offer the instructor to improve the course?**
Response Rate:	16.67% (**1** of **6**)

1	The only suggestion I have would be to start off the course with an in-class walk-through before reading the chapter. I only suggest this because some of the chapters were a bit dense and the in-class walk-throughs and smaller projects helped me to learn the material better.
